BOPO Purchase Award

With great attitude and an open mindset to test new things in order to move our company forward, this person always focus on finding the best solution for the team. In a true "one team" spirit, taking responsibilities outside of this area he solves problems to ensure that we keep it simple - the award goes to one of our true role models here at Purchase! A rock, living the H&M values every day.

Vaios Kiritsis

———— Professional profile ————

Senior Scrum Master with 5+ years of experience managing software development projects. Skilled in providing effective leadership in deadline-driven environments with agile processes. I am now looking for new challenges as a Scrum Master where I can use my knowledge as a Scrum Master and system developer.

About me:

- Excellent team player, posses excellent judgment, timely and high quality decision-making skills

- Strong analytical, planning, and organizational skills with an ability to manage competing demands. Ability to write SQL queries

- Strong time management and coordination skills, and ability to adjust to change to seamlessly execute and meet Sprint goals

- Strong analytical and problem solving skills, able to identify areas of improvement and make sound recommendations to solve problems

- Strong written and verbal communication skills with the ability to interact with all levels of the organization

- Strong ability to communicate clearly and articulate project conditions (verbal written)

———— Experience ————

Scrum Master at H&M   2004 - Present

I am a pragmatic Scrum Master working at H&M within a cross-functional and self-managing team. During my time as Scrum Master the team went from four big releases per year to small biweakly releases.

Responsibilities:

- Protected the development team from outside distractions, impediments and maintained focus on product backlog

- Worked closely with product owner in backlog management and continuous delivery of features

- Ensured work items were estimated

- Educated and reinforced scrum methodology and agile framework to team members

- Measured teams performance using appropriate tools and techniques

- Planned and sheduled biweakly releases
